

**Biodiver.City GmbH**  
Speerstrasse 26A  
8942 Oberrieden

is regularly tested by our company Biolytix AG for pathogenic germs and for the content of Zn, S, Fe, Cu, B, K, P, nitrate, nitrite and ammonium. The raw materials used are certified organic and comply with the Swiss Organic Farming Ordinance, which is an integral part of ORGANIC certification. Production samples are taken at regular intervals and analysed in the ISO 17025 accredited laboratory of Biolytix AG.

This certificate refers to the statutes of the requirements catalogue of the ORGANIC certificate and confirms compliance with them. The inspections serve to ensure continuous quality assurance, strengthen the manufacturer's quality awareness and identify any problems at an early stage.
